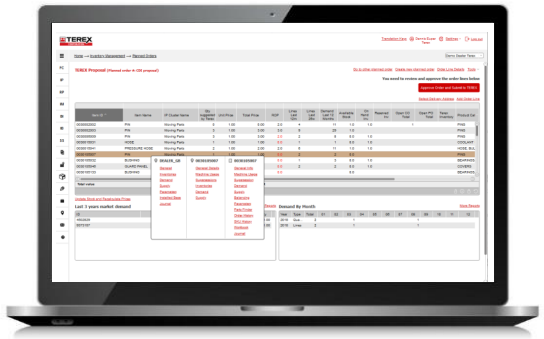
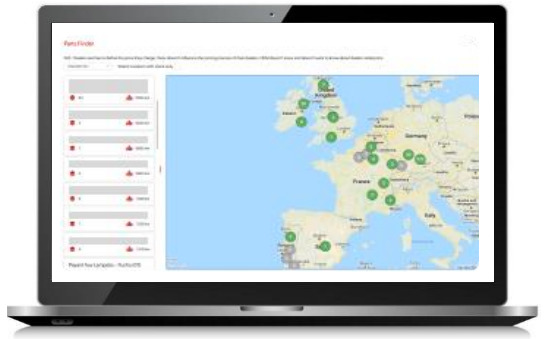
As a trusted Terex partner you have the opportunity of connecting to Terex and accessing online digital tools that will support you with your Parts & Service Business

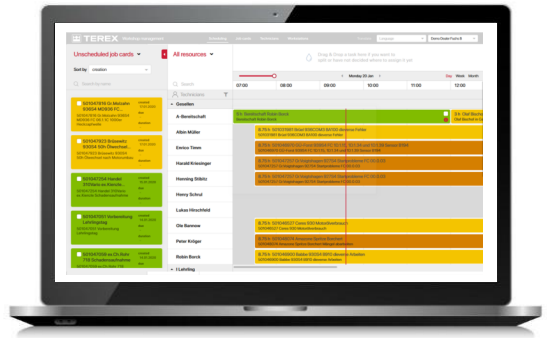
CDI - Connected Dealer Inventory



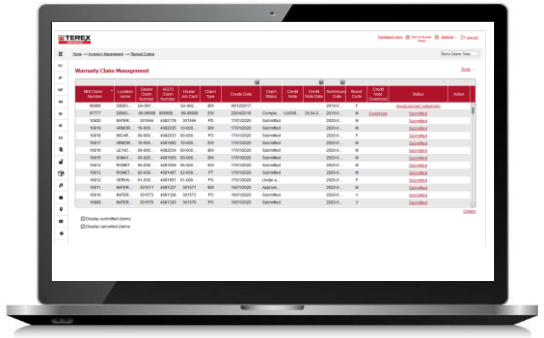
Parts Planning



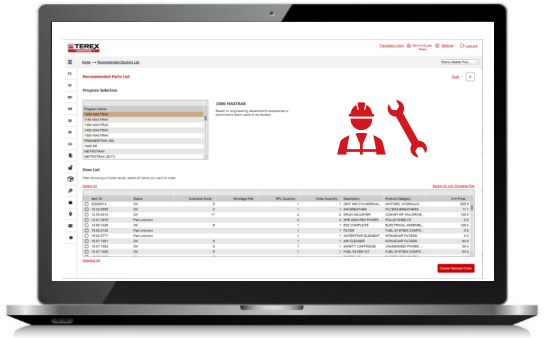
Parts Finder



Workshop Management



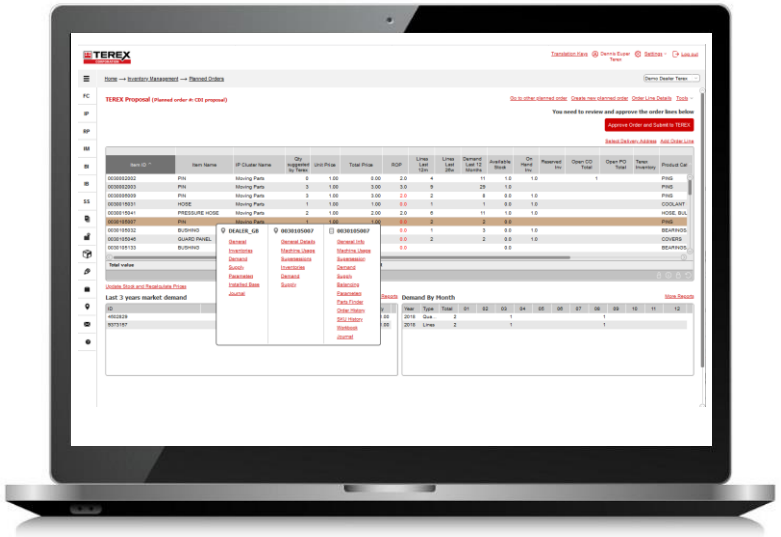
EDI - Electronic Data Interchange



Telematics based Service Management

Reports & Business Intelligence Analytics

With CDI Parts Planning

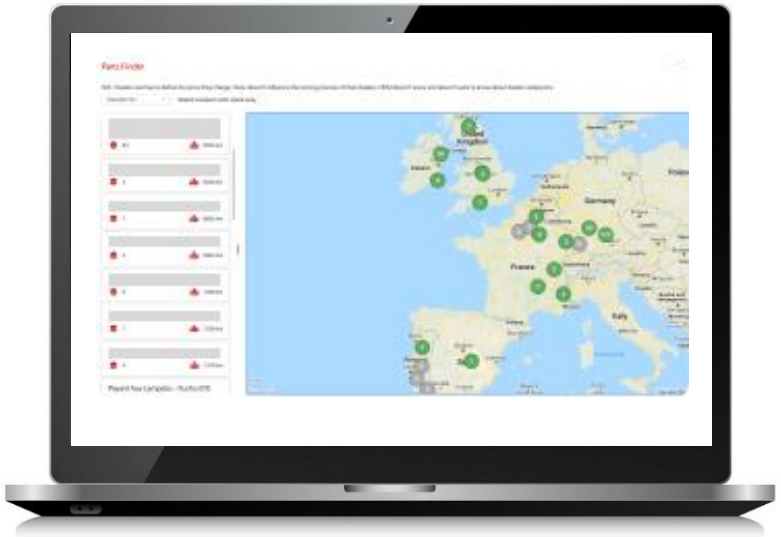


& Machine Parts Lists

I am able to…

- … plan & replenish my inventory of parts with few clicks
- … reduce risk of obsolescence or excess of stock
- … proactively stock the right parts for my customers and my machines when needed

With CDI Parts Finder



I am able to…

… increase my sales by offering slow-moving parts to other Terex Partners

… quickly resolve emergency situations by finding available stock in my proximity

… get live visibility of Terex inventory

With EDI Electronic Data Interchange

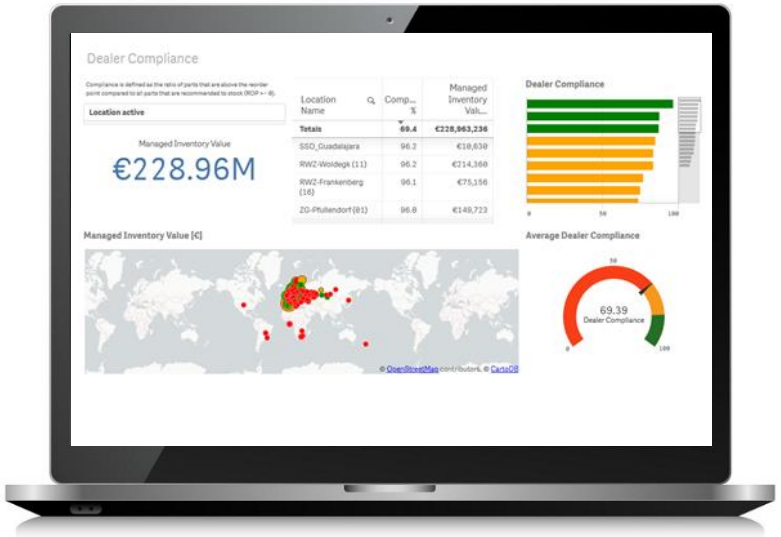
I am able to…

… place a Purchase Order to Terex directly from my own system without having to re-type parts & quantities in Terex Portal

… receive Terex data automatically in my own system to be always up to date in terms of master data, supersessions, pricing, etc.

… receive purchase order acknowledgement, order status, shipping advise and AR invoice in my own system

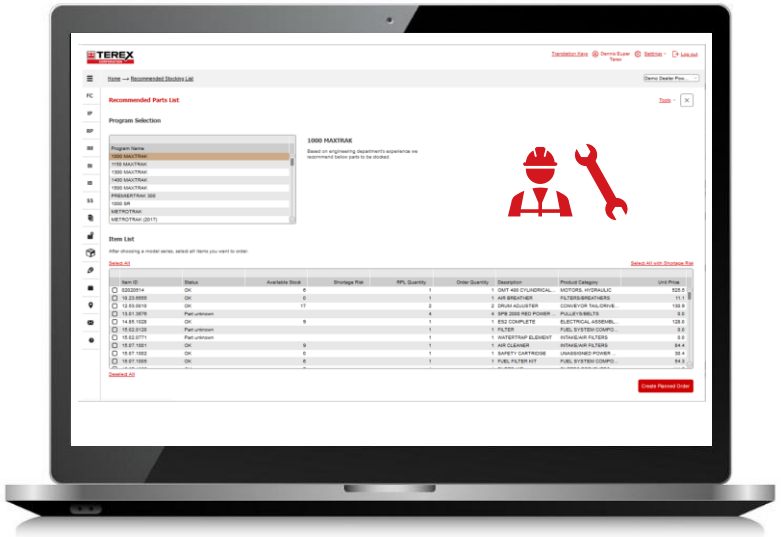
With CDI Reports & BI Analytics



I am able to...

- ... get more transparency of Terex technical information
- ... easily identify actionable insights for improvement opportunities
- ... save time by automating and tailoring reports to my needs

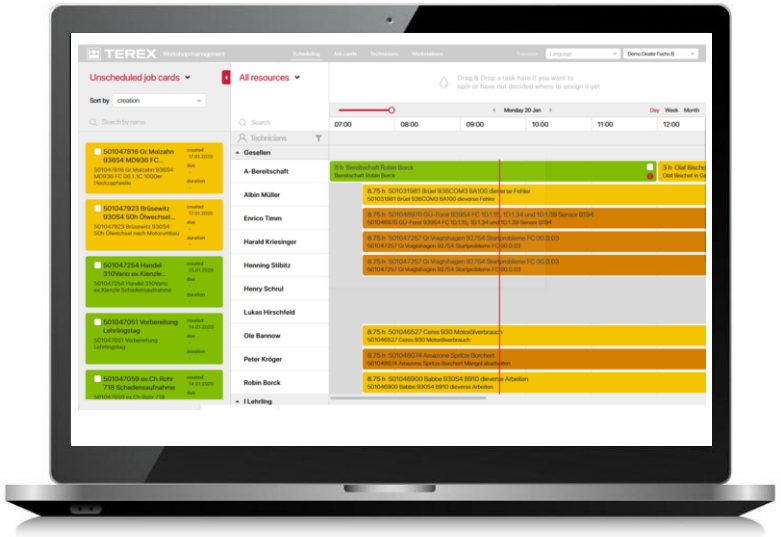
With Telematics based Service Management



I am able to…

- … track all upcoming machine services on CDI & Terex Telematics Systems
- … access the Service Bill-of-Material for each Terex machine Serial Number
- … perform a quick & easy check on what can be immediately covered by my stock and replenish what is missing easily via CDI

With CDI Workshop Management



I am able to…

… increase profitability by optimizing my workshop's utilization and job scheduling

… eliminate paperwork by leveraging intuitive, digital & automated processes

… improve customer satisfaction and repair time with integrated technical information & parts planning

Frequently Asked Questions

… What is the main advantage for me using CDI?

With CDI you **SAVE TIME** to manage your parts inventory and replenishments, you are supported by an advanced Planning system to **REDUCE OBSOLESCENCE** and **IMPROVE AVAILIBILITY** and gain access to all Terex data & digital integrated services that will make your life much easier

… What if I do not sell parts recommended by CDI?

CDI is completely **RISK FREE**. The forecasting accuracy is above 95%, on top you are protected by a very generous **CDI RETURN POLICY** to prevent any obsolescence risk

… Does CDI cost anything?

CDI is completely **FREE OF CHARGE**, internal costs for each connection exceeds 15k USD before additional DMS charges. Terex will cover providing full user commitment

… What about Data security?

CDI manages **ONLY STATISTICAL** and **ANONIMIZED DATA** relevant for parts planning, all confidential information will never be transferred to CDI. Your data is also protected by a strict NDA with Terex

… How is the system configured and how frequently can I receive a CDI stocking proposal?

The entire CDI configuration, including the frequency of reordering, planning policies, demand coverage, etc. …, is made with you and **TAILORED TO YOUR SPECIFIC NEEDS**
